

1 **UNITED STATES DISTRICT COURT**
2 **DISTRICT OF NEVADA**

3
4 Scientific Games Corp., et al.,
5 Petitioners,
6 v.
7 AGS LLC,
8 Respondent

Case No.: 2:17-cv-00343-JAD-NJK

**Order Overruling Petitioner's Objections,
Affirming Magistrate Judge's Order, and
Denying Motion to Strike**

[ECF Nos. 66, 67, 70]

9 This discovery dispute arises from petitioners Scientific Games Corp., Bally
10 Technologies, Inc., and Bally Gaming, Inc.'s (Scientific Games) attempt to obtain documents
11 and deposition testimony from AGS, LLC, which is a third party to a separate court action filed
12 against Scientific Games in the Northern District of Illinois. Magistrate Judge Koppe quashed
13 Scientific Games's third-party subpoena in part and compelled discovery in part. Scientific
14 Games objects to Judge Koppe's order and asks me to overrule the parts of the order quashing
15 the subpoenas and compelling AGS to produce the requested information. I overrule Scientific
16 Games's objections and affirm Judge Koppe's order. AGS also moves to strike Scientific
17 Games's objections for failure to comply with local rules. I deny that motion.

18 **Background**

19 Scientific Games makes automatic card shufflers for casino card tables. It is also a
20 defendant in a case pending in the United States District Court for the Northern District of
21 Illinois. The plaintiffs in that case brought antitrust-monopolization claims against Scientific
22 Games arising out of alleged sham patent litigation against DigiDeal, a company that also makes
23 automatic card shufflers. AGS is a non-party to the Illinois action, but it entered into an
24 intellectual-property agreement with Shuffle Tech, one of the Illinois plaintiffs, for technology
25 related to automatic card shufflers. DigiDeal once had a similar agreement with Shuffle Tech,
26 which Shuffle Tech alleges that Scientific Games disrupted by pursuing the sham patent
27 litigation.
28

Scientific Games served AGS with deposition and document subpoenas aimed at AGS's involvement in developing and selling a card shuffler based on the technology acquired from Shuffle Tech. AGS objected to the majority of the requests, so Scientific Games initiated this action with a motion to compel AGS to comply. After the parties met and conferred and narrowed their dispute to specific document requests and deposition topics, they filed a joint statement outlining the remaining issues requiring court attention. The table below outlines the narrowed requests and Judge Koppe's determinations for each:

| Narrowed Document Requests | | Judge Koppe's Order |
|-----------------------------------|--|----------------------------|
| No. 2 | Documents sufficient to show AGS's sales projections for any casino automatic card shufflers covered by AGS's agreement with Shuffle Tech and/or the sales of which will result in any compensation to Shuffle Tech. | Quashed |
| No. 3 | Documents sufficient to show AGS's current and projected costs for manufacturing any casino automatic shufflers covered by AGS's agreement with Shuffle Tech and/or the sales of which will result in compensation to Shuffle Tech. | Quashed |
| No. 4 | Documents sufficient to show when any casino automatic card shufflers covered by AGS's agreement with Shuffle Tech and/or the sales of which will result in any compensation to Shuffle Tech became or will be available for sale, and in what quantity. | Quashed |
| No. 6 | Documents sufficient to show all projections related to automatic card shufflers for future payments, royalties, or other financial transfers from AGS to DigiDeal, Shuffle Tech, Aces Up, and/or Poydras-Talrick Holdings. | Quashed |
| Deposition Topics | | |
| No. 1 | Your relationship with any Plaintiff and/or DigiDeal, including but not limited to any contractual, corporate, financial, or other relationship related to automatic card shufflers. | Compelled |
| No. 2 | Your sales, cost, and revenue projections for any shuffler using or incorporating technology developed by Shuffle Tech. | Quashed |
| No. 3 | All payments by You to any Plaintiff or DigiDeal related to automatic card shufflers. | Compelled |
| No. 4 | The revenue or profits that any Plaintiff has realized or is entitled to in connection with Your development and sale of any card shuffler. | Compelled |

Judge Koppe quashed document requests nos. 2, 3, and 6 and deposition topic no. 2 because AGS demonstrated that the information was confidential and contained trade secrets,

1 and that AGS risked competitive disadvantage through disclosure to Scientific Games, a
2 competitor that already enjoys a large market share in the automatic-card-shuffler industry.¹
3 Judge Koppe also determined that Scientific Games did not meet its burden to show that it has a
4 substantial need for the information.² Judge Koppe noted that AGS had already agreed to
5 provide a report of actual payments and expenses that AGS has made to Shuffle Tech and AGS
6 presented evidence showing that any future royalty payment obligation ceased in April 2018.³

7 Judge Koppe quashed document request no. 4 because AGS's Vice President of Table
8 Games declared under penalty of perjury that "there is no current prototype [for their automatic
9 card shuffler], and, as a result, there are no documents showing when any such shuffler will be
10 sold and in what quantity."⁴ Because it would therefore be impossible to comply with the
11 document request, Judge Koppe quashed the subpoena for that request.

12 Scientific Games moves for reconsideration of the portions of Judge Koppe's order
13 quashing its subpoenas. It contends that Judge Koppe clearly erred when she determined that
14 AGS established that the information Scientific Games sought was confidential or contained
15 trade secrets. Scientific Games also argues that Judge Koppe's determination that Scientific
16 Games did not meet its burden to show it has a substantial need for the requested information
17 was contrary to law.

18 Discussion

19 A. Standard of review

20 A district judge may reconsider any pretrial order of a magistrate judge if it is "clearly
21 erroneous or contrary to law."⁵ The clearly erroneous standard applies to a magistrate judge's
22
23

24 ¹ ECF No. 66.

25 ² *Id.*

26 ³ *Id.*

28 ⁵ 28 U.S.C. § 636(b)(1)(A).

1 findings of fact.⁶ “A finding is clearly erroneous when[,] although there is evidence to support
2 it, the reviewing body on the entire evidence is left with the definite and firm conviction that a
3 mistake has been committed.”⁷ A magistrate judge’s order “is contrary to law when it fails to
4 apply or misapplies relevant statutes, case law[,] or rules of procedure.”⁸ The district judge
5 “may affirm, reverse, or modify” the ruling made by the magistrate judge, or remand the ruling
6 to the magistrate judge with instructions.⁹

7 **B. Trade-secret and confidential-information discovery standard**

8 “The Ninth Circuit has long held that nonparties subject to discovery requests deserve
9 extra protection from the courts.”¹⁰ A third-party can object to the production of subpoenaed
10 documents to the extent that doing so discloses “a trade secret or other confidential research,
11 development, or commercial information.”¹¹ In analyzing such an objection, courts must first
12 determine if the subpoenaed party has shown that the requested information is protected as a
13 trade secret or confidential commercial information.¹² The party resisting discovery “must make
14 a strong showing that it has historically sought to maintain the confidentiality of this
15 information.”¹³

16 When a subpoenaed party meets its initial burden, “the burden shifts to the requesting
17 party to show a ‘substantial need for the testimony or material that cannot be otherwise met

1 without undue hardship”¹⁴ “Substantial need” requires a showing that “the requested
2 discovery is relevant and essential to a judicial determination of [the party’s] case.”¹⁵ The
3 district judge must “balance the need for the trade secrets [or confidential information against the
4 claim of injury resulting from disclosure.”¹⁶ “The determination of substantial need is
5 particularly important in the context of enforcing a subpoena when discovery of a trade secret or
6 confidential commercial information is sought from non-parties.”¹⁷ If the requesting party
7 establishes a substantial need, the court then looks to whether procedures exist (i.e., protective
8 orders) to mitigate any burden or prejudice to the nonparty.¹⁸

9 **D. Judge Koppe’s order was not clearly erroneous or contrary to law.**

10 AGS objected to document requests 2, 3, and 6 because they sought “information that is a
11 trade secret and/or confidential commercial information.”¹⁹ Notwithstanding those objections,
12 AGS indicated that it did not have “adequate responsive documents” to any of the document
13 requests because “AGS does not have a casino card shuffler fully developed and/or ready for
14 production, mass production[,] or a complete trial in a casino.”²⁰ Because no product exists,
15 AGS contends that it does not have sales projections, manufacturing costs, or a sense of
16 quantities of the product that AGS will eventually produce. To the extent that AGS has draft
17 projections, AGS contends they are speculative and confidential. But in an effort to resolve this
18 matter, AGS agreed to provide to Scientific Games immediate written notice of all actual
19 payments, if any, when paid to Shuffle Tech through April 2018, when all of AGS’s payment

1 obligations to Shuffle Tech cease. Judge Koppe determined that AGS's declarations sufficiently
2 showed that AGS treated the subject information as highly confidential and that disclosure to
3 Scientific Games, a major competitor with a large market share, would be prejudicial to AGS.

4 Scientific Games argues that Judge Koppe's factual finding was clearly erroneous. It
5 contends that AGS "did not argue or demonstrate . . . that its sales projections, . . . current and
6 projected manufacturing costs, . . . or projections of future payments to Shuffle Tech . . .
7 qualified as trade secrets."²¹ Scientific Games contends that AGS only argued that it did not
8 possess "adequate" responsive documents. But AGS's first objection to each of these document
9 requests was that they asked for trade secret and confidential information. While AGS argued
10 that it did not possess responsive documents, it also argued that any documents it does have are
11 confidential.²² AGS's Vice President of Table Products declared that the subject product is
12 under secret and confidential development and that AGS is "particularly concerned about the
13 competitive forces" of Scientific Games gaining access to confidential information.²³ He
14 specifically asserts that the "financial data regarding the Subject Product including current and
15 anticipated development costs has been and will continue to be maintained as confidential."²⁴

16 Judge Koppe's determination that AGS sufficiently demonstrated that the information
17 Scientific Games requested is confidential and contains trade secrets was not clearly erroneous.
18 As Judge Koppe stated, "confidential projections about product development, including sales,
19 costs[,] and royalties, appear to be well within the scope of information deemed by the Ninth
20

21 ²¹ ECF No. 67 at 9.

22 ²² Scientific Games contends that AGS cannot both say that there are no responsive documents
23 and that any responsive documents would be trade secrets. But their position is not inconsistent.
24 AGS repeatedly states that they do not have a product, so don't have fleshed-out documents
25 responsive to Scientific Games's subpoena. However, AGS acknowledges that any draft
26 documents they do have are speculative and inaccurate, and also that those documents contain
27 information that is confidential and qualifies as trade secrets. I see no problem with
28 simultaneously asserting both objections. Also, to the extent that Scientific Games objects to
Judge Koppe's decision to quash document request no. 4 because no responsive documents exist,
I agree with that determination as well.

27 ²³ ECF No. 62-8 at 3.

28 ²⁴ *Id.*

1 Circuit to be a trade secret or confidential commercial information.”²⁵ And disclosure to a
2 competitor is more harmful than disclosure to a noncompetitor.²⁶ Nothing within Judge Koppe’s
3 determination leaves me with the firm conviction that a mistake has been committed.

4 Scientific Games also contends that Judge Koppe’s finding that it did not show it had a
5 substantial need for the information was contrary to law. Judge Koppe determined that, with
6 respect to documents request nos. 2 and 6, Scientific Games conclusorily stated that it has a
7 substantial need for the information because AGS’s sales will bear directly on Scientific
8 Games’s market power and competition in the market without supporting that contention. As to
9 document request no. 3, Judge Koppe determined that Scientific Games conflated substantial
10 need and relevance, and did not show the former. She also noted that all discovery “regarding
11 projections of sales and costs is not essential to the resolution of the Illinois Action as to
12 damages mitigation/offset” because AGS agreed to disclose all actual payments to Shuffle Tech,
13 and any future royalty payment obligation ceased in April 2018.²⁷

14 Scientific Games disagrees. It contends that, while Judge Koppe identified the correct
15 legal standard for assessing substantial need, she failed to apply that standard to its arguments
16 establishing a substantial need.²⁸ Scientific Games repeats that the requested information is
17 necessary to defend against Shuffle Tech’s alleged damages by showing that Shuffle Tech can
18 mitigate through AGS’s royalty payments. Scientific Games points to Shuffle Tech’s damages
19 expert in the Illinois action, who calculated Shuffle Tech’s damages using a mitigation amount
20 based in part on the payments Shuffle Tech plans to receive from AGS. Scientific Games
21 contends that it needs the requested information to refute that expert report. But, as Judge Koppe
22 pointed out, AGS’s agreement to provide written notice of all payments made to Shuffle Tech

23
24 ²⁵ ECF No. 66 at 3 (citing *Apple Inc. v. Samsung Elecs. Co.*, 727 F.3d 1214, 1222 (Fed. Cir. 2013) (discussing *In re Elec. Arts. Inc.*, 298 F. App’x 568, 569 (9th Cir. 2008))).

25 ²⁶ See, e.g., *American Standard, Inc. v. Pfizer, Inc.*, 828 F.2d 734, 741 (Fed. Cir. 1987)
26 (collecting cases).

27 ²⁷ ECF No. 66 at 4 n.3.

28 ²⁸ ECF No. 67 at 12.

1 before its payment obligations cease renders all additional discovery related to Shuffle Tech's
2 mitigation unnecessary.

3 Scientific Games also contends that AGS's sales projections are essential to the jury's
4 assessment of Shuffle Tech's claim that Scientific Games monopolized the casino automatic card
5 shuffler market. But Judge Koppe correctly noted that Scientific Games didn't explain *how* the
6 requested information was essential, and it didn't demonstrate why it couldn't meet its need for
7 the information in some other way without undue hardship. So, I find that Judge Koppe's
8 determination that Scientific Games did not show a substantial need for the information was not
9 contrary to law.

10 **C. Motion to strike**

11 AGS moves to strike Scientific Games's motion because it contends that Scientific
12 Games failed to comply with Local Rules IC 2-2(b) and IC 2-2(c).²⁹ AGS's basis for this motion
13 stems from a notice of non-compliance entered by the clerk's office stating that the documents
14 with the motion "should have been filed as separate entries."³⁰ Scientific Games's attorney
15 spoke with the CM/ECF Helpdesk after receiving the notice and clarified that the motion was a
16 single pleading seeking review of Judge Koppe's order and that Scientific Games sought no
17 additional relief that would require a separate docket entry. Because Scientific Games did not
18 fail to comply with the local rules and the notice of non-compliance upon which AGS relies was
19 merely a clerical error, I deny AGS's motion to strike.

26
27 ²⁹ ECF No. 70.

28 ³⁰ ECF No. 68.

1
2 **Conclusion**

3 Accordingly, IT IS HEREBY ORDERED that Scientific Games's objections [ECF Nos.
4 **67] are OVERRULED** and Judge Koppe's order quashing Scientific Games's subpoenas [ECF
5 **No. 66] is AFFIRMED.**

6 IT IS FURTHER ORDERED that AGS's motion to strike [ECF No. 70] is **DENIED.**
